(54) Title: ELECTROLUMINESCENT DISPLAY PANEL

(57) Abstract: The invention relates to an electroluminescent display panel (2) comprising a substrate and a plurality of display pixels (3) including an electroluminescent material defined on or over said substrate. The display panel (2) further includes at least one microcontact printed hydrophobic layer (11) between adjacent display pixels (3). The invention further relates to a method for manufacturing such a display panel. The method avoids the need to apply photoresist barriers for containing the liquid electroluminescent material.
